

Our Third-Generation Thin Clients Pack Big Features in a Small Footprint

Special feature for IBM 5250 users, choose Text, Windows or ▲
Graphical User Interface (GUI), at the price of a text only terminal

Mounting options include vertical or horizontal orientations and
monitor integration ▲

The YES_tation Mini is 35% smaller
than competitive Thin Clients ▼

The new YES_tation Mini family of thin clients just raised the bar for performance, while lowering the desktop space requirement. Built around an Intel®-compatible AMD 466 processor that can run either Windows® CE.NET or embedded XP operating systems, the new hardware platform is 35% smaller, 20% faster, uses 30% less power and is 29% less expensive than other thin clients.

YES_tation Mini has a very small footprint – only 7.75" by 6" by 1.5" – and can be mounted vertically on a wall or attached to a monitor. The unit weighs only 1.5 pounds allowing for optimal mounting options, and low shipping costs.

The YES_tation Mini model 2221 provides ICA and RDP clients for connections to Windows Terminal Services and Citrix servers. Model 2225 adds an embedded Internet Explorer 6.0 browser for access to Web-enabled applications, including email. Priced at \$249 and up, it is the lowest-priced Internet Terminal for IBM iSeries and OS/400 users running Client Access, Rumba or other server based emulators. Terminal-style 122-key, 5250/PC keyboards are supported with Affirmative's keyboard drivers and map files.

YES_tation Windows Based Terminals (WBT) using CE.NET have several new features not available previously, including a secure VPN client and support for USB disk drives. Other free features include Acrobat Reader and Microsoft® Office Viewer clients for display and print of PDF, Word, Excel, Access and Powerpoint files received as email attachments or from Internet/Intranet sessions.

The YES_tation Mini's advanced technology provides the best price/performance in the industry.

Backed by Affirmative's superior technical support and seven years of thin client experience with AS/400 and iSeries users, the YES_tation Mini is an ideal enterprise-wide solution.
